Satellite Session  
Monday, October 7th: 14:00 – 15:00 PM

Strategic Directions for Therapeutic HIV Vaccine Research

Session Chairs: José Esparza, PhD (Bill & Melinda Gates Foundation, US), Kevin Fisher, PhD (AVAC, US)

The therapeutic vaccine field has seen a revival in the recent years, largely associated with the cure agenda. The Enterprise, together with AVAC, the Treatment Action Group, and the Bill & Melinda Gates Foundation, organized a meeting to discuss the state of the field and to provide strategic recommendations for future developments. The satellite will update on the issues discussed at the meeting, including: scientific gaps in therapeutic vaccine development; opportunities for scientific coordination and synergies between the areas of therapeutic vaccine, preventive vaccine, the treatment optimization, and cure research; and ethical and regulatory considerations related to trial design, including choice of clinical endpoints.

Presenters: Kevin Fisher (AVAC), Yegor Voronin, PhD (Global HIV Vaccine Enterprise, US)

Agenda

2:05 – 2:10  Yegor Voronin - GHVE on Timely Topics
2:10 - 2:30  Kevin Fisher - Overview of Therapeutic Vaccine Meeting in Washington DC
2:30 - 2:55  Expert panel with Q&A, moderated by Jose Esparza (Gates Foundation, US)  
Panelists:  
- Susan Barnett (Novartis, US)  
- Lucy Dorrell (U. of Oxford, UK)  
- Nicole Frahm (HVTN, US)  
- Genoveffa Franchini (NCI, US)  
- Felipe Garcia (Hospital Clinic. Barcelona, Spain)  
2:55 -3:00  Jose Esparza – Closing remarks
